

EVERY 2 MINUTES A CHILD IS DIAGNOSED WITH CANCER

The Foundation was created in memory of two extraordinary boys – Neev and Ronil – who courageously battled Diffuse Intrinsic Pontine Glioma (DIPG), a universally fatal pediatric brain tumor. Our mission is clear: we fund groundbreaking DIPG research, support families through the hardest moments of their lives, and amplify community voices to drive awareness and policy change.

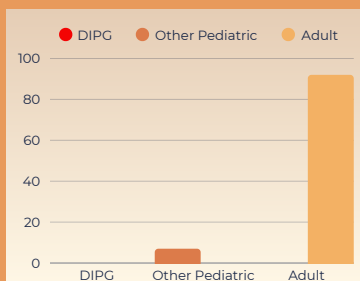

WHY SUPPORT DIPG CHILDHOOD CANCER

#1 disease-related cause of death in children

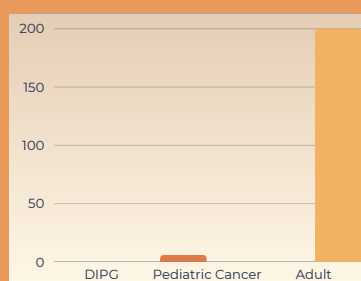

Survival

DIPG has a 0% survival rate

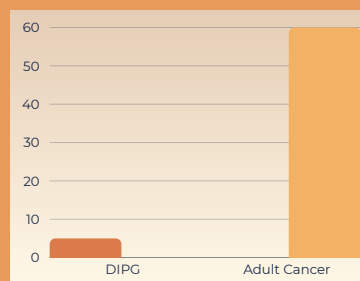

Federal Funding

Pediatric drugs lag 9 years behind adults

of Drugs in last 10Y

Average diagnosis age is 5.

Age of Diagnoses

2024-2025 IMPACT

Research Investment - \$130K

- \$50,000 towards a Multi-Institutional, Multi-Continent Imaging Data Collection Project
- \$50,000 for a study that explores how the gut microbiome influences treatment
- \$25,000 Research Funding Partner, Chad Tough Defeat DIPG Foundation
- \$6,000 First Clinical Trial in India with PNOG
